PRODUCTION UNITS

### MANUFACTURING CAPABILITY

#### Controlled Production Infrastructure

##### Fabrication & Forming

Roll-forming lines, press brakes, shearing capacity up to 12mm. In-house punching, bending, and welding across mild steel, stainless steel, and aluminum.

##### Surface Treatment

Hot-dip galvanizing (IS 4759, ASTM A123), electro-galvanizing, powder coating, and paint finishing. Owned and controlled processes.

##### Export Documentation

Material test certificates (MTC), Certificate of Origin (COO), inspection reports, packing lists, commercial invoicing. Export-ready operations.

##### CNC Machining

Multi-axis CNC machining with  $\pm 0.01$ mm tolerance control. Defence-grade precision for custom components and small-batch production.

##### Inspection & Testing

Dimensional inspection, coating thickness measurement, salt spray testing, material certification. Third-party inspection welcome.

##### Logistics Capability

Container loading, export packing, documentation coordination. Experience with FOB, CIF, and CFR terms across all major ports.

### MANUFACTURED PRODUCTS

#### Product Range by Procurement Category

##### ELECTRICAL INFRASTRUCTURE

- Cable trays (ladder, perforated, raceway)
- Cable tray accessories and fittings
- Earthing and grounding systems
- Copper busbars and strips
- Lightning protection components

##### STRUCTURAL & INDUSTRIAL

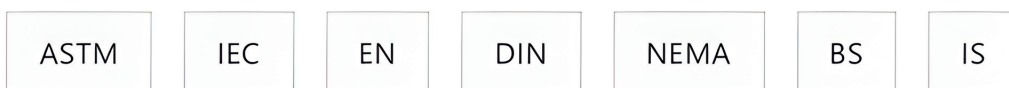

- Electroforged gratings (IS 2713)
- Fabricated steel supports and frames
- Tower fabrication and assemblies
- Industrial flooring systems
- Custom structural steel work

##### PRECISION & CUSTOM

- CNC machined components
- Defence-grade precision parts
- Custom metal fabrication
- Small-batch specialty items
- Project-specific engineering

### ENGINEERING COMPLIANCE

#### Standards-Based Engineering

### PROCUREMENT RISK REDUCTION

#### Why Direct Sourcing From Vajra

- Direct manufacturer with no intermediaries. All production under single facility control.
- Standards-based engineering across ASTM, IEC, EN, DIN, NEMA, BS, and IS specifications.
- Order flexibility from prototype quantities to full container loads.
- 50-year operational history with documented domestic defence and infrastructure clients.
- Export documentation readiness: MTC, COO, inspection reports prepared as standard.
- Owned surface treatment lines ensure coating quality and delivery control.

### MARKETS SERVED

#### Global Export Capability

Serving EPCs, OEMs, and contractors across Americas, Europe, Middle East, Southeast Asia, Africa, Australia, and United Kingdom. Experience with international standards compliance, export documentation, and container logistics to all major ports.
